Paul Herzing

Paul Herzing is the Chief Information Officer at BryceTech, with over 20 years of experience innovating enterprise architecture solutions in the Government sector. He oversees Bryce's enterprise computing operations, manages the company's regulatory compliance posture, and provisions IT resources to support Bryce's clients and contracts. He has a background in cloud transition and deployment for data-sensitive services, and he is an expert in the commercial use of open-source software.

Mr. Herzing is also a software developer and user experience designer with a background in Agile methodologies. He has leadership experience on contracts that won the NASA Group Achievement and Space Flight Awareness Team awards. Prior to BryceTech, Mr. Herzing was Chief Information Officer of The Tauri Group. He received his Bachelor of Arts from Macalester College.

Mr. Herzing provides IT consulting and operational support for several non-profit organizations.
